**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

With regard to ATTS petition to eliminate competition by way of denying local net providers access to their local copper bridge networks, please consider and remember that one purpose of the FCC is to promote the development of technologies and services that benefit the very population the FCC serves and is funded by.

As a user of the internet and other communication services running on these networks, quality of network service and that of customer service when an issue arises, is very important to us. ATT has failed us miserably on both counts, causing us to fire ATT as a service provider. As such, they are hardly in a position to pretend they can serve any additional clients that cutting out local networks would provide when the current track record is so dismal.

Separately, Comcast was fired for the same reasons.

Sonic is our choice now, with product and service that simply outpaces anything their competition hopes to provide. No wonder ATT wants this type of competition to disappear.

In writing this note, we will seriously consider dropping conventional internet access technologies if the only choices end up being ATT or Comcast. Radio link, independent satellite consolidators or whatever we must use to avoid spending any further money with ATT and Comcast will be our prime motivation.

Id be happy to provide specific details if contacted via any method below.

Thank you,
John Moss
